Dedicated to service...

Welcome

It gives me great pleasure to welcome you to the maiden edition of our internal Newsletter. The objective of the monthly newsletter is to present to members of staff and friends of the Company an overview of project activities and other company information. We take this special opportunity to thank our principal client; MTN Nigeria Communications Ltd for the opportunity to be of service. This edition features the successful completion of the ten kilometers (10km) rebuild of last mile copper and fibre optic cable network infrastructure along Bourdillon and Alexandra Road Ikoyi, following the road expansion carried out by Lagos State Government. The project was implemented alongside the road contractors to minimize disruption to existing voice and data services, as we rebuilt the entire infrastructure. We also feature the success recorded by our Satellite Implementation team at Mallam Fatori, Borno State, North-East Nigeria, a border town between Nigeria and the Republic of Chad and we are proud to be associated with the success of MTNN as the first Nigeria Mobile Telephone company to connect Mallam Fatori and neighboring villages to the National Network. We congratulate our new intakes, the Regional Technical Officer and the new team of Copper and Fibre Optic cable specialist from Nokia Siemens Nigeria. We also bring you highlights of our Branch operations and expansion to new Cities. Our thanks to the entire management and staff for their steadfastness and believe in our effort towards building the best and most preferred telecom infrastructure support company in Nigerian and the entire West Africa Sub-region. We remain dedicated to service. Thank you,

Gbenga Adebayo
Chief Executive Officer
